Updated Drill Program: 9,000 Metres on the Knight Gold Project

DISCLAIMER

We are in the mineral exploration and development business. It is inherently risky, and all potential investors should be keenly aware of this.

*This presentation contains forward-looking statements. All statements, other than of historical fact, that address activities, events or developments that **Orefinders Inc.** believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding the estimation of mineral resources, exploration results, potential mineralization, potential mineral resources and mineral reserves) are forward-looking statements. Forward-looking statements are generally identifiable by use of the words “may”, “will”, “should”, “continue”, “expect”, “anticipate”, “estimate”, “believe”, “intend”, “plan” or “project” or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond **Orefinders Inc.**’s ability to control or predict, that may cause the actual results of the project to differ materially from those discussed in the forward-looking statements. Factors that could cause actual results or events to differ materially from current expectations include, among other things, without limitation, failure to establish estimated mineral resources, the possibility that future exploration results will not be consistent with **Orefinders Inc.**’s expectations, changes in world gold markets and other risks disclosed to the Canadian provincial securities regulatory authorities. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, **Orefinders Inc.** disclaims any intent or obligation to update any forward-looking statement. All currency numbers are in \$CAD unless otherwise stated.*

KNIGHT PROJECT: PRIORITY 2020 DRILLING TARGETS

1. Tyranite Mine

- Reported historical production: 31 Koz gold grading 5.04 g/t
- Associated with shear zone intruded by syenitic dykes
- Plunging mineralized trend open at depth

2. Porphyry Lake

- Major geophysical (IP) anomaly that has not previously been drill tested
- Potential for a large gold-enriched hydrothermal system

KNIGHT PROJECT: PRIORITY 2020 DRILLING TARGETS

3. Minto-style Targets

- Breccia pipe-like targets similar to the Minto discovery.
- Identified by aeromagnetic signatures similar to Minto.
- Anomalous gold from outcrop samples.

4. Duggan West Trend

- 400m West of mineralized, historically drilled Duggan Zone.
- Interpretation of new geophysical inversion modelling suggest a geological and structural setting similar to Tyrannite.

1. TYRANITE MINE LOCATION

Tyranite 2020 Drilling focused on:

- Down-plunge continuity of high-grade zone below historical development
- Strike continuity of mineralization
- Understanding Structural Geology controls on mineralization
- Structural measurements from orientated drill core
- Approximately 5,000m of drilling budgeted

TYRANITE EXPLORATION FOCUS

2. PORPHYRY LAKE AND MINTO LOCATION

GEOPHYSICAL ANOMALY AT PORPHYRY LAKE

TARGET IDENTIFICATION AND DRILLING

- Major untested IP high chargeability anomalous zone over 300m wide under Porphyry Lake with likely on-shore continuity.
- Multiple significant gold intersections from historical drilling in area of Porphyry Lake geophysical anomalies.
- The above suggest potential for a large gold alteration/mineralized system centered on Porphyry Lake
- Target has not previously been drill tested
- 650m of drilling budgeted

3. NEW MINTO-STYLE TARGETS

- High priority targets identified via reprocessing high-resolution magnetic survey using Minto discovery as a reference
- New survey shows three dozen similar point like magnetic anomalies within the same formation that hosts Minto and Porphyry Lake systems
- Assays from outcrop sampling confirmed multiple targets for follow up exploration.
- 550m of drilling budgeted.

4. DUGGAN WEST TREND

- About 400m West of the historically drilled Duggan Zone.
- Identified as a geological and structural setting similar to the Tyranite Mine.
- Geological and structural interpretation based on recently completed inversion modelling of high-resolution aeromagnetic data.
- 2700m of drilling budgeted.

BOARD & MANAGEMENT

Stephen Stewart – CEO and Director

- 15 years of experience in the resource and finance industries
- Focused on the M&A, exploration and development of resource assets
- Held senior officer with numerous TSX Venture companies.

Alexander Stewart – Director

- Over 40 years of experience in the practice of securities law and natural resource investment. In the past he was the
- Founder behind a number of mining projects including the Cote Lake Project and the Eagle One deposit.

Charles Beaudry –Director

- Geologist with more than 35 years of experience across the globe
- 17 years with Noranda-Falconbridge-Xstrata as well as a tenure with IAMGOLD as General Manager of New Business Opportunities.

Claude Bouchard – Director

- Mining engineer with +30 years experience
- Previously held senior management positions at the Levack and Footwall deposits for FNX Mining Company Inc. and for Rubicon Resources.

Tony Moreau – Director

- Tony is the Head of Innovation at IAMGOLD and was previously manager of Special Projects.
- Previous experience in the continuous improvement function at the Rosebel Gold Mine and was lead on IAMGOLD's international mining company peer benchmarking program.

Jeffrey Potwarka – CFO

- Chartered Professional Accountant and Certified Management Accountant with +20 years experience with Canadian small cap companies.

Dr. Keith Benn – VP Exploration

- PhD in Structural Geology and most recently Director of Structural Geology at Goldcorp Inc.
- Extensive experience in the Abitibi Greenstone belt and other regions in Canada, Africa and South America.

Gautam Narayanan – VP Corporate Development

- Previously worked in equity research covering Base and Precious Metals at Canaccord Genuity
- Former consultant focusing on natural resource investments-- primarily covering the global phosphate and potash industry.

Antoine Schwartzman – Geology Manager

- Project Geologist managing and coordinating exploration activities.
- BSc and MSc in Geology
